ABOUT ME

Recent Software Engineering graduate with a strong passion for building scalable backend systems and high-performance mobile applications. Proficient in Node.js ecosystem (Bun.js, Elysia.js, Express), MongoDB, and Flutter. Hands-on experience developing full-stack e-commerce and task management platforms with real-time features, authentication, and payment integration. Eager to contribute technical skills and quick learning ability to a professional development team as a Fresher Backend.

EDUCATION

HO CHI MINH CITY UNIVERSITY OF FOREIGN LANGUAGES AND INFORMATION TECHNOLOGY 2022 - 2026

Bachelor of Software Engineering (Graduated April 2026) | GPA: 3.2 / 4.0

IELTS CERTIFICATION Dec 2025

Overall Score: 4.5 / 9.0 | Focus: Reading Technical Documentation

WORK EXPERIENCE

TARGET MEDIA | DATA ADMIN & DEVELOPER 12/2025 - 4/2026

- Hotline & Data QC: Provided PG support via hotline and monitored data for cheating detection.
- Data Management: Structured and adjusted project data according to core business principles.
- Logistics & Scheduling: Prepared and set up project schedules to meet campaign requirements.
- Frontend Development: Developed a high-performance Landing Page using React-Vite.
- API Integration: Researched and integrated Booking APIs to automate scheduling.

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Dart.
Backend Development: Bun.js, Node.js, Elysia.js, Express.js, RESTful APIs, Postman
Frontend & Mobile Development: React.js, Next.js, Tailwind CSS, Flutter, Android Native, Material Design 3
Databases: MongoDB, MSSQL.
Deployment & Cloud Services: Vercel, Cloudinary
Tools & Version Control: Git, GitHub, Android Studio, VS Code, Visual Studio.
Side Skills: UI/UX Design (Figma), Presentation Design (Canva).
AI Tools: ChatGPT, Claude, Grok, Copilot (AI-augmented coding & productivity)

PERSONAL PROJECTS

PERSONAL PORTFOLIO

portfolio-iota-seven-icepzi6kn7.vercel.app | https://github.com/phongdz76/Portfolio.git

AMAZON APP

Jul 2025

https://github.com/phongdz76/Amazon-.git

Admin/User workflows, including authentication, product management, ordering, notifications, and livestream shopping.

- Architecture: Flutter mobile client + Node.js/Express REST API + MongoDB backend; Socket.IO service for realtime features.
- Tech Stack: Flutter, Dart, Provider, Node.js, Express, MongoDB, Mongoose, JWT, bcrypt, Cloudinary, Apple Pay/Google Pay.
- Authentication & Security: Implemented email/password login, JWT-based sessions, role-based access control (Admin/User), and OTP reset-password flow.
- Core Features: Delivered product/category search, cart, wishlist, checkout (Online/COD), order tracking, and cancellation request handling.
- Admin, Realtime & Analytics: Built admin product/order CRUD, notification center (unread/mark-read/mark-all-read), realtime rating updates, revenue analytics, and livestream product selling.

SGTECH

Sep 2025

https://github.com/phongdz76/e-commerce.git

Built a secure, full-stack e-commerce platform with Next.js, MongoDB, and Stripe, delivering end-to-end flows from authentication and password recovery to cart management and online payment.

- Developed a full-stack e-commerce web app using Next.js 15, React 19, MongoDB (Prisma), and Stripe.
- Built secure authentication with NextAuth (Credentials + Google OAuth), JWT session strategy, and bcrypt password hashing.
- Implemented complete account recovery flow: forgot/reset password via expiring token email with Nodemailer.
- Delivered cart and checkout backend flow with persistent cart state (localStorage), real-time totals, and Stripe PaymentIntent order creation in VND.
- Designed responsive UI with Tailwind CSS + Material UI, integrated form validation and in-app toast feedback.

TASK MANAGER

Mar 2026

https://task-manager-jqce.vercel.app | https://github.com/phongdz76/TaskManager.git

Developed a full-stack task management platform for Admin/User workflows, covering authentication, task collaboration, notifications, and reporting.

- Architecture: Monorepo with separated backend REST API and frontend SPA; modularized by Auth, Users, Tasks, Notifications, Reports.
- Tech Stack: Node.js, Express, MongoDB, React, Vite, Tailwind CSS, Axios, Recharts, JWT, Cloudinary, Nodemailer, ExcelJS.
- Authentication & Security: Implemented email/password login, Google OAuth 2.0, JWT authorization, role-based access control, password hashing, and forgot/reset password flow via email token.
- Task Management: Delivered task CRUD, assignment, checklist-driven progress auto-sync, status updates, overdue detection, pin/unpin, filtering, and pagination.
- Team & Notification Features: Built team-member summary and in-app notification center with polling, unread badge, mark-read, mark-all-read, and clear-all actions.
- Reporting & Integrations: Exported task/user/team data to Excel reports and integrated Cloudinary for profile image upload.
